EDUCATION

Malla Reddy Institute of Technology and Science — Aug 2021 - Jun 2024
Bachelors of Technology in Information Technology — **CGPA: 7.2/10**

SKILLS AND INTERESTS

Java, HTML, CSS, JavaScript,C++, React.js, Node.js, MongoDB, SQL, Git, Microsoft 360 Tools, Logo Designing, , Teamwork, Leadership

PROJECTS

Creating the Calculator — March 2025 - March 2025
- The Calculator Web App is a lightweight, interactive tool designed to perform basic arithmetic operations with a clean and responsive user interface.
- Built using HTML, CSS, and JavaScript, this application mimics the functionality of a standard calculator, allowing users to quickly and accurately compute addition, subtraction, multiplication, and division.
- **Key Technologies:** HTML, CSS, JavaScript, Responsive Web Design, DOM Manipulation, UX/UI Principles, Error Handling, Input Validation

Portfolio websites — Feb 2025 - Mar 2025
- Designed and developed a fully responsive personal portfolio website using HTML, CSS, JavaScript, and modern front-tend best practices. The site showcases projects, skills, and professional background, providing a clean and accessible user experience across all devices and browsers.
- Focused on UI/UX design principles, creating intuitive navigation and visually appealing layouts. Integrated contact forms, project sections, and social media links to improve interactivity and engagement. Emphasized performance optimization, responsive design, and code reusability.
- **Key Technologies:** HTML, CSS, JavaScript, Responsive Design, UI/UX Design, Web Accessibility, SEO Basics, Git/GitHub

To-Do List Feb 2025 - Mar 2025
- Developed a dynamic and interactive To-Do List application using HTML, CSS, and JavaScript to help users manage daily tasks efficiently.
- The app allows users to add, edit, delete, and mark tasks as completed, with real-time DOM updates and a user-friendly interface.
- **Tech Stack:** HTML | CSS | JavaScript | DOM Manipulation | LocalStorage | Responsive Design

Weather App — Apr 2025 - Present
- Built a responsive and user-friendly Weather App using HTML, CSS, and JavaScript, integrating real-time weather data via a third-party Weather API (e.g., OpenWeatherMap).
- The app allows users to search for any city and view current weather conditions, including temperature, humidity, wind speed, and weather icons.
- **Key Technologies:** HTML | CSS | JavaScript | REST API | JSON | Responsive Design | Error Handling | DOM Manipulation

CERTIFICATIONS

- **Google** Generative AI Fundamentals with Google Cloud
- **Google** Create Image Captioning with Google Cloud
- **Google** Introduction to Responsible AI with Google Cloud

RELEVANT COURSEWORK

Data Structures, Algorithm, Database Management System, Object Oriented Programming, MySQL, UI/UX Design
